

# Aurel Aliszpahity Ba.

Software Test Engineer

Email: aurel900104@gmail.com

Phone: +36301833518

Date of birth: Jan, 1990

Nationality: European

Link: <https://www.linkedin.com/in/aurel-aliszpahity-ab7ab2196/>

## OBJECTIVE

I'm a creative person and I enjoy pushing myself forward, learning new things, putting myself in uncomfortable situations that cause me to grow. I love doing great things.

## EXPERIENCE

Worldwide (Budapest based office)

Mar 2022 - Present

### Software Test Engineer (Medior)

GE Healthcare

I was part of Edison IDAM project backend team. With the quality assurance team, we build an automated test project for Java application, based on Java Spring. We use the Serenity and JBehave frameworks, and every day I work in a multicultural environment with people from different cultural backgrounds.

Budapest

Nov 2020 - Feb 2022

### Quality Assurance Automation Engineer

OANDER Development

Oander is an eCommerce and online product design studio and product implementer company with headquarters in Budapest, Hungary.

Business analysts, designers, developers and project managers at Oander have special expertise in eCommerce and new media products, enterprise portal design and development, content production workflow design, online strategy, market analysis for merchants, media companies and online active enterprises.

Oander Connect - middleware engine. It is based on the Erlang language and communicates with integrated systems (e.g. Magento-Middleware Software-Salesforce) on an event-based basis via an API. Regarding the database, it uses MongoDB and AWS S3 to store the logs. My task was testing the entire system (reviewing logs), testing new features, partially manual testing, and setting up an automated testing project within the company - Cypress.

In addition, the work required serious documentation skills, and I also demoed the developed features to the customers. (if the developer was on vacation :))

Vienna

May 2020 - Sep 2020

### Web Developer (e-commerce)

MELON Informationstechnologie GmbH

Contract-based assignment for web store development. (WooCommerce)

Budapest

Jun 2017 - Nov 2019

### Project Management Unit Leader (IT)

Eötvös Loránd University

Managing the IT team in daily work, and building new application logic and online dashboard for university students. Testing the application dashboard and creating new application forms regarding the grant type. (Waterfall)
