

# ANDRIN RENZ

Serial Entrepreneur | Web3

## PROFESSIONAL PROFILE

---

I am a serial entrepreneur from Switzerland, building in Web3. From apprentice chef to tech entrepreneur, I have garnered huge success yet also suffered some devastating lows. But I have always moved step by step; Ferociously. Today, I am living the life of a digital nomad.

## WORK EXPERIENCE

---

### FOUNDER & CEO

JAN 2020 - NOW | EventScouts AG

We are building the world's first blockchain-based, user-owned, event and activity database. At its core, EventScouts is a decentralized social network focused on lists. Creators own the content they create and other people can invest in the future success of another user's content.

- Started with just a vision and a dream
- Brought together a small and diverse international team
- Raised USD 250k from high-profile angel investors
- Product live, over 600 users per month and growing
- Generated first revenue

### FOUNDER

JUN 2019 - NOW | [www.never-stop-asking.com](http://www.never-stop-asking.com)

I started a blog and write in-depth research reports about stocks and crypto. For stocks, I follow a bottom-up approach and constantly try to identify small or mid-cap companies which are undervalued and possess a unique business model.

- The main goal of this blog is to push myself to do regular deep dives in areas that interest me.
- Some of my articles have been picked up by other publishers
- Built a small but organic community on Discord

# WORK EXPERIENCE CONTINUED

---

## ACCOUNT-MANAGER

JUN 2017 - MAI 2019 | Bitcoin Suisse AG

Bitcoin Suisse was one of the earliest and biggest crypto brokers in Europe. I joined the Startup as employee #7 in the year 2017. We scaled to +120 employees within a year. The early joiners were usually grabbing the most urgent tasks until we scaled to a size in which the company was able to create departments and responsibilities.

- Onboarded thousands of retail and institutional clients (including KYC procedure)
- Build-up the entire customer support strategy using Zendesk
- Redesigned and relaunched a new B2C trading platform for retail clients with our internal dev team
- Supported the ICO (Initial Coin Offering) team with communication and research
- Traded OTC (over-the-counter) for HNWI through our internal desk
- Helped to operate a nationwide Bitcoin-ATM network until we divested it.

## FOUNDER & CEO

NOV 2013 - JUN 2017 | Secret Switzerland GmbH

I created my first own food startup and generated well above CHF 150k in annual revenue through different revenue streams. My vision was to change the way in which food was delivered to homes. I sold up to 94 meals on a single lunch break and gained experience in all related fields; food safety, marketing, regulations, tax and accounting, and much more.

- Built my very first own Startup
- Designed and manufactured and coordinated with multiple partners
- Nailed my first exit in 2017 by selling the business to a local business man
