 Hong Kong, Hong Kongese

 Remote - Kowloon City

Présentation

My goal is to be a hard-working, dedicated developer for those who care, support, and hire me.

I all really love what I do, and I believe in my goals.

Of course, there are talented, brilliant engineers everywhere.

However, as in life, there is no success without competition, and I hope that the difficult times of now will be cherished in the future.

"I wanna build a professional career I love while living a life I love while constantly developing new skills."

This is my creed.
