Summary:
Software engineer. Adept of "Clean code" and "Code Complete" philosophies. Primary experience with JavaScript, TypeScript, and various Front-end frameworks (React (mostly), Angular, AngularJS, Backbone.js, D3.js). Also have experience in the role of full-stack engineer with server-side techs such as Node.js (Express, Koa, Nest), Python3 (utility scripts, Dash Plotly), and a little bit of pure Java (maintaining, bugfix). Confident user of Unix-like systems. Continuously sharpen my skills in programming by learning different languages, reading books, and solving problems.

Education:
Universities:
University of Customs and Finance (Sep 2012 – Jan 2018)
Degree: Master's degree
City: Dnipro, Ukraine
Occupation: Transport technologies and logistics
Korea University of Technology and Education (Feb 2017 – Jul 2017)
Degree: Exchange student
City: Cheonan, Republic of Korea
Occupation: Industrial management
Courses:
Korean language school (드니프로 한글 학교)
Hillel IT School (Front-end)

Experience (4+years):
> Freelancer, self-employed (May 2018 – Jan 2019):
>> Role: Front-end developer
>
> Moovweb (Jan 2019 – Nov 2019):
>> Role: Front-end developer (React)
>
> Shipnext (Nov 2019 – Oct 2020):
>> Role: Full-stack developer (MERN stack)
>
> Uran (Nov 2020 – May 2021):
>> Role: Full-stack developer (React + Koa.js)
>
> GBSFO (May 2021 – now):
>> Role: Front-end engineer

Skills with commercial experience:
> **Front-end:**
>> JavaScript, TypeScript, React, Angular, AngularJS, Backbone.js, jQuery, Redux, Redux-saga, D3.js, HTML, CSS (Scss)
>
> **Back-end:**
>> Node.js (Express.js, Koa.js), MongoDB, Python3
>
> **DevOps:**
>> Docker, Docker-compose, Ansible, Bash, Unix-like systems

Skills with non-commercial experience or ready-to-learn:
> Nest.js, C/C++, Java, Kotlin, Rust, WebAssembly, Lisp Scheme.

Languages:
> Ukrainian/Russian – native
> English – fluent
> Korean – beginner
