EXPERIENCE

- June 2022 - Present
Edevtech / Modern Requirements
Customer Success Analyst

My role as a Customer Success involves managing strategic client relationships, providing software support, handling tickets and manual testing the query and to provide support to organizations such as Philips, Siemens, Novo Nordisk and more. By combining strong customer relationships, technical expertise, and strategic guidance, I contribute to the overall satisfaction, growth, and retention of our valued clients.

Key Aspects of my Role

- Handling of client tickets and inquiries related to the software. When clients encounter any issues, I promptly and effectively address their concerns, providing guidance and troubleshooting assistance.
- Collaborate with internal teams, such as product development, to relay customer feedback and contribute to product enhancements.
- Providing our clients leverage of our software to achieve their business objectives more effectively. This approach enhances their overall satisfaction, strengthens their partnership with our organization, and contributes to their long-term success
