With over a decade of combined experience as an SAP Consultant, IT Strategist, and Project Manager, I've learned how to balance technical expertise with a people-first approach. I am all about clear communication, collaborating with diverse teams, and making sure projects run smoothly from start to finish. Whether it's project planning or optimizing processes, I thrive on simplifying complex tasks and making things work more efficiently. I am now looking to pivot into a role where I can continue applying my project management skills while also exploring my passions for sustainable living and purpose-driven projects. I bring a hands-on approach to problem-solving, always looking for ways to improve workflows and keep everything on track. Plus, I'm always excited about taking on new challenges.
